SEMOLINA FLOUR RECIPE

INGREDIENTS
17 – 18 oz of Semolina flour (500 grams)
5 – 6 oz of Water (150 grams)

Note: This may vary upon kitchen humidity & environment. Please adjust accordingly.

DIRECTIONS
Put semolina flour in the hopper and press mix. Drizzle 4 oz of water into the hopper while mixing. Mix for 3-5 minutes. Check the consistency after 3 minutes; it should begin to resemble a crumbly dough mixture. Grab a handful of dough and open your palm. If you see any dry flour, drizzle the remaining liquid (2 oz) while in mix mode for 30 seconds — then begin to extrude.

EGG PASTA RECIPE

Yields 4 main course servings

Double zero flour and eggs give this pasta a taste and texture that is reminiscent of sheeted egg pasta. Crack room temperature eggs and blend them with a fork to incorporate the yolks and the whites before weighing.

Accompaniment/sauce hints: beef, prosciutto, parmigiano, cream, butter, herbs

INGREDIENTS
110 grams (approximately 2 large) shelled whole eggs, at room temperature 22%
Approximately 80 grams room temperature water 16%
300 grams double zero soft wheat (grano tenero) pasta flour 60%
200 grams semolina 40%

DIRECTIONS
Blend the eggs with the water. Combine the double zero flour and semolina in the extruder hopper and mix until thoroughly incorporated before introducing the egg and water mixture. Mix, adjusting the hydration as necessary, and extrude as per the instructions above.

COMMON TYPES OF FLOURS USED FOR EXTRUDING

SEMOLINA
Semolina flour is a granular flour with a light yellow color. It is produced from durum wheat, which is used almost exclusively for making pasta. It is also high in protein and gluten. When using Semolina flour in a extruder, you will be delighted with superior results!

DURUM WHEAT
Durum wheat has the ideal properties for making the best pasta. It is high in protein and gluten, which are both necessary for pasta making.

WHOLE WHEAT
Whole wheat flour is produced from grinding the full wheat berry (kernel). All parts of the wheat berry are used in the flour including the bran, germ and endosperm; which when milled, creates the speckled brown color that is a characteristic of the flour.

GLUTEN FREE
Gluten is the protein present in wheat flour and it can be challenging to bake without it. Some popular gluten free flours are white rice, buckwheat, millet, masa and chickpea flour.

DOUBLE ZERO
In Italy, flour is classified as 1, 0, or 00, according to how finely ground the flour is and how much bran and germ have been removed. 00 is the most highly refined flour and is talcum powder soft, yet holds its protein and nutritional value.
