

DOUGH SHEETER | COUNTER TOP

LORENZA

ARCOBALENO™
PASTA EQUIPMENT

ASC420

ABILITY TO ROLL THICK DOUGH

STANDARD FEATURES

- Dough rollers are manufactured in solid stainless steel rollers with a diameter of 60mm (2.5") and a working length of 420mm (16.5") for uniform sheeting even with thicknesses of a few tenths of a millimeter
- Compact to take up minimal space on the worktop
- Fast removal of the "dough scrapers" so that they can be thoroughly cleaned every day and easily be replaced
- Allows feeding in dough up to a thickness of 40mm featuring a second in-feed very close to the sheeting rollers for pastry thinner than 10mm in order to prevent crumpling the pastry and hence an uneven thickness. With these two independent in-feeds, it is like having two machines in one!
- Dough thickness adjustment system allows for effortlessly changing the roller opening from zero to 15mm.
- Excellent dough handling thanks to the two idle drive rollers coupled to the dough in-feed chute
- Easy roller parallelism adjustment without having to remove any guard
- Factory and on-location training—the only full-service pasta machine manufacturer in North America

OPTIONAL FEATURES & ACCESSORIES

- ☐ Pasta trays - solid and perforated
